

INDEX TO VOL. III.

GEOMETRY OF TWO DIMENSIONS.

	Page
Elementary Investigations of the methods of drawing Tangents to the Conic Sections. By <i>A. R. Grant</i>	94
On Geometrical Reciprocity. By <i>A. Cayley</i>	173
Note on the Minimum Value of the Area of a Polygon circumscribed about a given Reentering Curve. By the <i>Rev. Harvey Goodwin</i>	181
Demonstration of Pascal's Hexagramme. By <i>T. Weddle</i>	285

GEOMETRY OF THREE DIMENSIONS.

On a Principle in the theory of Surfaces of the Second Order, and its application to M. Jacobi's Method of Generating the Ellip- soid. By <i>R. Townsend</i>	1, 97, 148
On Asymptotic Planes and Asymptotic Surfaces. By <i>W. Walton</i>	28
On the condition that a Plane should touch a Surface along a Curve Line. By the <i>Rev. George Salmon</i>	44
On the number of Normals which can be drawn from a given Point to a given Surface. By the <i>Rev. George Salmon</i>	46
Demonstration of a Geometrical Theorem of Jacobi's. By <i>A. Cayley</i>	48
On Symbolical Geometry. By <i>Sir William Rowan Hamilton</i>	68, 220
Theorems on the Lines of Curvature of an Ellipsoid. By <i>M. Roberts</i>	159
On certain Curves traced on the Surface of an Ellipsoid [Poinso't's <i>Poloids</i>]. By <i>G. J. Allman</i>	287

ALGEBRA AND TRIGONOMETRY.

To develop $(\cos x)^a$ in a series of Cosines for all values of a . By <i>Francis W. Newman</i>	61
On the Theory of Elimination. By <i>A. Cayley</i>	116
On the Expansion of Integral Functions in a series of Laplace's Coefficients. By <i>A. Cayley</i>	120
Note on a Result of Elimination. By the <i>Rev. George Salmon</i>	169
On certain Algebraic Functions. By <i>James Cockle</i>	179
The Calculus of Logic. By <i>George Boole</i>	183

DIFFERENTIAL AND INTEGRAL CALCULUS.

	Page
On some Theorems of use in the Integration of Linear Differential Equations. By the <i>Rev. Brice Bronwin</i> . . .	35
On the Theory of Elliptic Functions. By <i>Arthur Cayley</i> . . .	50
Notes on the Abelian Integrals—Jacobi's system of Differential Equations. By <i>Arthur Cayley</i> . . .	51
Note sur la Théorie des Fonctions Elliptiques. Par <i>M. C. Hermite</i> . . .	54
On Γa , especially when a is negative. By <i>Francis W. Newman</i> . . .	57
Theorems with reference to the solution of certain Partial Differential Equations. By <i>William Thomson</i> . . .	84
On the Values of a Periodic Series at certain limits. By <i>Francis W. Newman</i> . . .	108
On a General Transformation of any Quantitative Function. By <i>George Boole</i> . . .	112
On the value of $\left(\frac{d}{dx}\right)^\theta x^\theta$ when θ is a positive proper fraction. By the <i>Rev. W. Center</i> . . .	163
On a certain Periodic Function. By <i>Henry Wilbraham</i> . . .	198
On the Application of a Symbol of Discontinuity to Questions of Maxima and Minima. By <i>William Walton</i> . . .	201
On certain Points in the Theory of the Calculus of Variations. By the <i>Rev. Harvey Goodwin</i> . . .	225
Suggestion on the Integration of Rational Fractions. By <i>Professor De Morgan</i> . . .	238
Application of certain Symbolical Representations of Functions to Integration. By the <i>Rev. Brice Bronwin</i> . . .	243
On Differentiation with Fractional Indices, and on General Differentiation. By the <i>Rev. W. Center</i> . . .	274
On an Integral Transformation. By <i>A. Cayley</i> . . .	286

MECHANICS.

Note on the Integration of the Equations of Equilibrium of an Elastic Solid. By <i>William Thomson</i> . . .	87
On the Attraction of a Straight Line. By <i>Ferdinand Joachimsthal</i> . . .	94
Note on the Axis of Instantaneous Rotation. By <i>G. G. Stokes</i> . . .	128
Remark on the Theory of Homogeneous Elastic Solids. By <i>G. G. Stokes</i> . . .	130
Note on the Problem of Falling Bodies as affected by the Earth's Rotation.	206
On the Strength of Materials, as influenced by the Existence or Non-existence of certain Mutual Strains among the particles composing them. By <i>James Thomson</i> . . .	252
On the Elasticity and Strength of Spiral Springs, and of Bars subjected to Torsion. By <i>James Thomson</i> . . .	258

INDEX.

vii

HYDROSTATICS AND HYDRODYNAMICS.

	Page
Notes on Hydrodynamics—	
II. On the Equation of the Bounding Surface. By <i>William Thomson</i>	89
III. On the Dynamical Equations. By <i>G. G. Stokes</i>	121
IV. Demonstration of a Fundamental Theorem. By <i>G. G. Stokes</i>	209

LIGHT AND SOUND.

On the determination of the Modulus of Elasticity of a Rod of any Material, by means of its Musical Note. By <i>Andrew Bell</i>	63
---	----

HEAT, ELECTRICITY, AND MAGNETISM.

On the Mathematical Theory of Electricity in Equilibrium. By <i>William Thomson</i>	
II. General Principles	131
III. & IV. Geometrical Investigations with reference to the Distribution of Electricity on Spherical Conductors	141, 266

MISCELLANEOUS.

Mathematical Notes.	93, 285
---------------------	---------

Notes and other passages enclosed in brackets [], are insertions made by the Editor.

The date of actual publication of any article, or portion of an article, may be found by referring to the first page of the sheet in which it is contained.—ED.
